

The River Mile Field Investigations

August 6, 2013

Spring Canyon Day Use Area

8:00-5:00

We will conduct the program similarly to The River Mile's model student program.

This program features:

- Formulate questions about the site
- Design a research project/experiment which you will then conduct
- Prepares you to conduct similar programs on your own

Explore the connections between the land and the water through inquiry-based activities. Learn how to create and lead field investigations, and lead students to develop their own field investigations. Take your student activities and research projects to the next level!

TRM Field Investigations Registration Form

Name _____
School _____
Address _____
City _____ State _____ Zip _____
Email _____
Phone _____
Grade _____

Registration Deadline: August 1, 2013
